

RSI attrition funnel across open-weight models

The diagram is a funnel chart with three horizontal bars of decreasing width, representing the attrition of models at different stages. The top bar is blue, the middle is orange, and the bottom is teal. Each bar contains text describing the stage and its success rate. The bars are centered horizontally and their widths decrease from top to bottom.

attempts: 50/50 (100%)

emits correct kernel: 35/50 (70%)

compounds (held-out gain): 10/50 (20%)
