

RSI attrition funnel across open-weight models

attempts: 50/50 (100%)

The diagram is a funnel chart with three horizontal bars of decreasing width, centered on a white background. The top bar is blue, the middle bar is orange, and the bottom bar is teal. Each bar contains text describing a stage in the attrition process. The bars are positioned at the top, middle, and bottom of the frame, with the teal bar being the smallest and centered horizontally.

emits correct kernel: 35/50 (70%)

compounds (held-out gain): 10/50 (20%)
